

## PROFILE

I am a youthful AI engineer, researcher and robotics developer. Programming and working with computers in general has been a passion for quite some time.

In love with automation and minimizing repetitive work, which is why I'm able to focus on efficient & application-oriented learning, developing and problem solving.

Switching views, working on agile projects and changing approaches often motivate me to study new topics, tackle hard challenges and deliver results.

## BIRTHDATE

11 januari 2000

## ADDRESS

Houthalen-Helchteren, Belgium

## PHONE NUMBER

+32486539354

## MAILING ADDRESS

kobethuwis26@gmail.com

# KOBE THUWIS

## EDUCATION

---

### 2018-2021: Hogeschool PXL

Bachelor in Applied Information Technology with a specialisation in Artificial Intelligence (AI) & robotics.

### 2012-2018: Kindsheid Jesu

High school diploma in Maths & Sciences

## EXPERIENCE

---

### PXL Smart ICT: Research & Development Intern 2021 - Present

ArtiFISHal Intelligence is a twofold project, consisting of scenes made in Unity which illustrate several reinforcement learning techniques. Secondly, the project contains a simulation of a marine ecosystem which uses state of the art evolutionary algorithms.

### Chiro Meulenberg: Head Monitor 2019 - Present

The head monitor is responsible for the entire group and is often required to make democratic decisions and lead others where needed. Chiro Meulenberg is a youth movement counting more than 250 active members.

### Strandbal: Event Manager 2018 - Present

Strandbal is a small event / festival in Houthalen-Helchteren. The profit of Strandbal is used to fund the workings of Chiro Meulenberg. Strandbal is one of the bigger youth-events in Houthalen: 2000+ youngsters visit the event every year!

### Youth Council Member 2019 - Present

As a member of the youth council I am involved in local politics and youth counseling in Houthalen-Helchteren.
