KOBE THUWIS

PROFILE

I am a youthful AI engineer, researcher and robotics developer. Programming and working with computers in general has been a passion for quite some time.

In love with automation and minimizing repetitive work, which is why I'm able to focus on efficient & application-oriented learning, developing and problem solving.

Switching views, working on agile projects and changing approaches often motivate me to study new topics, tackle hard challenges and deliver results.

BIRTHDATE
11 januari 2000

ADDRESS
Houthalen-Helchteren, Belgium

EDUCATION

2018-2021: Hogeschool PXL
Bachelor in Applied Information Technology with a specialisation in Artificial Intelligence (AI) & robotics.

2012-2018: Kindsheid Jesu
High school diploma in Maths & Sciences

EXPERIENCE

PXL Smart ICT: Research & Development Intern 2021
PXL Smart ICT is a research branch of Hogeschool PXL. During my internship, I worked on different machine learning techniques for the ArtiFISHal Intelligence 2.0 project.

Chiro Meulenberg: Head Monitor 2018 - Present
The head monitor is responsible for the entire group and is often required to make democratic decisions and lead others were needed. Chiro Meulenberg is a youth movement counting more than 250 active members.

Strandbal: Event Manager 2017 - Present
Strandbal is a small event / festival in Houthalen-Helchteren. The profit of Strandbal is used to fund the workings of Chiro Meulenberg. Strandbal is one of the bigger youth-events in Houthalen: 2000+ youngsters visit the event every year!

Youth Council Member 2019 - Present
As a member of the youth council I am involved in local politics and youth counseling in Houthalen-Helchteren.
